EDUCATION

STANFORD UNIVERSITY, Stanford, CA

Sept. 2021–Jun. 2026

Master of Science in Computer Science (AI Concentration)

Bachelor of Science in Symbolic Systems (Neuroscience Concentration)

Combined GPA: 4.03

EXPERIENCE

Product Manager & Lead Developer, *Stanford SILICON-Uncode*

Jun. 2025–Present

- Directed full lifecycle of novel CLDR-data collection tool – MILQSHAKE. Managed roadmap and product vision, led technical implementation, and spearheaded deployment with the Unicode Consortium, advancing digital inclusion of 500+ low-resource languages. Site: milqshake.com.
- Engineered MILQSHAKE using LLMs, self-supervised machine learning techniques, and data-driven linguistic insights, synthesizing CLDR lexicon from 150+ bilingual parallel datasets.
- With 91% accuracy, MILQSHAKE outperforms current translation models – such as Meta's NLLB-200 – by over 80%, increasing SILICON's data-acquisition efficiency by over 100%.
- Selected as a Speaker at the Unicode Technology Workshop 2025, hosted at Microsoft.

Software Engineer, *Reverb LLC*

Nov. 2023–Aug. 2024

- Automated product testing, streamlining debugging, bettering customer service, enhancing issue-identification by 100%, and boosting efficiency by 367%. Employed Agile methodologies.
- Leveraged generative AI to optimize neuropsychology report generation, increasing consumer productivity by over 100%. Conducted performance summary of 10+ HuggingFace models, forecasting best strategic, cost-efficient AI solutions for medical-document summarization.
- Applied prompt engineering, developing and maintaining repository of 100+ LLM prompts. Wrote company-wide memos on latest industry trends, risk analyses, customer needs, and feedback.

Digital Literacy & Development Project Manager, *Sree Vari Matriculation School*

Jun. 2022–Sept. 2022

- Led creation of full digital literacy & CS development program in a rural school of 250+ students in Panikkanur, India. Regularly met with parents, teachers, and the principal to ensure alignment with community needs and foster ongoing engagement for sustainable change.
- Installed computers, designed resource-adaptive curricula, and built beginner coding course. Taught 5 classes/day of 20+ students of varying educational, technical, and linguistic levels.

Research Assistant, *Stanford Zeineh Laboratory of Radiology*

Mar. 2023–Jan. 2024

- Employed ITK-Snap application and cloud computing to analyze 100+ MRI scans. Conducted voxel-wise correlations and refined multimodal 2D-to-3D neuroimaging registration and segmentation, mapping MR imaging and histological data for Alzheimer's research.
- Co-authored 3 peer-reviewed publications in *Alzheimer's & Dementia* and *Imaging Neuroscience* – [DOI: 10.1002/dad2.70040, DOI: 10.1002/alz.092110, DOI: 10.1162/IMAG.a.106]

PROJECTS

Q&A Agent for Knowledge Extraction of Financial Models

Oct. 2024–Dec. 2024

- Designed innovative RAG pipeline & financial tool to bolster knowledge extraction and logical reasoning of financial data, attaining +108% accuracy and +143% knowledge extraction over GPT.
- Built conversational agent equipped with 5+ tools, including callable retrieval and CodeGen script.
- Produced the first Q&A dataset for financial modeling, examining five diverse public financial models to optimise use cases. Included 234 queries, answers, and complexity-based labels.

SKILLS

- Python, C, C++, SQL, JavaScript, React (TypeScript), Data Structures & Algorithms, UI/UX Design, Azure Frameworks, Web Development, Agile Methodologies, Machine Learning, LLMs, AI
